

MULTI-CHANNEL IN-OUT CABLE FREE THERMO-HYGROMETER

MODEL: EMR812HG

USER'S MANUAL

INTRODUCTION

Congratulations on your purchase of the Multi-Channel In-Out Thermometer / Hygrometer (EMR812HG) with a 433MHz cable-free thermo-hygro sensor.

Enclosed with this package is one (1) main display unit and one (1) cable-free remote thermo-hygro sensor unit.

The main unit has an extra-large multifunction 2-line LCD that shows recordings for indoor and outdoor temperatures, humidity, maximum and minimum recordings and trend indicators. The unit supports up to three 433MHz remote thermo-sensors or thermo-hygro sensors. A variety of additional sensors can be purchased separately.

In addition to monitoring maximum and minimum temperature and humidity readings, the unit also has an alarm that can be set to activate once readings exceed a given variance.

No wire installation is required between the main and remote units. As the EMR812HG operates at 433MHz, it can be used in the U.S. and most places in Continental Europe.

FEATURES: MAIN UNIT

Large two-line Liquid Crystal Display (LCD)
Function display showing temperature and humidity,
Memory, and trend indicators for the main unit and
Remote sensors.

SEL button
Switches between different channels
Enables remote sensor scanning mode

NOTE
Switches between the main-unit display and a selected
Remote unit
Enables search mode

LEAR button
Sets the maximum or minimum temperature and
Humidity readings
Sets the maximum and minimum temperature and
Humidity memory of remote sensor channels or the main
Unit display

ALARM button
Sets upper or lower temperature alarm limits of
Individual channels
Sets alarm settings

CH button
Sets readings for the upper or lower temperature and
Humidity of individual channels

- I °C/°F slide switch**
Selects between degree Centigrade (°C) and Fahrenheit (°F)
- J Battery compartment**
Accommodates two AA-size batteries
- K Retractable table stand**
For standing the main unit on a flat surface
- L Recessed Wall-mount hole**
For mounting the main unit on a wall

FEATURES: REMOTE THERMO-HYGRO SENSOR

- A Two-line LCD**
Displays the current temperature and humidity monitored by
the remote unit
- B LED indicator**
Flashes when the remote unit transmits a reading
- C °C/°F slide switch**
Selects between Centigrade (°C) and Fahrenheit (°F)
- D Channel slide switch**
Designates the remote unit Channel 1, Channel 2 or
Channel 3
- E RESET**

BEFORE YOU BEGIN

To ensure proper functioning of the EMR812HG follow this setup procedure.

For best operation:

1. Assign different channels to different remote units.
2. Insert batteries for remote units before doing so for the main unit (see instructions for battery installation).
3. Place the main unit as close as possible next to the remote unit, reset the main unit after installing batteries. This will ensure easier synchronization between the transmission and reception of signals.
4. Position the remote unit and main unit within effective transmission range, which, in usual circumstances, is 20 to 30 meters.

Note that the effective range is vastly affected by the building materials and where the main and remote units are positioned. Try various set-ups for best result.

Though the remote units are weather proof, they should be placed away from direct sunlight, rain or snow.

steps to install / replace batteries:

Remove the screws on the battery compartment.

Set the channel number on the **CHANNEL** slide switch.

Set the temperature display unit on the °C/°F slide switch.

Insert the batteries strictly according to the polarities shown

Remove the battery compartment door and secure its screws.

Replace the batteries when the low-battery indicator of the particular
channel lights up on the main unit. (Repeat the steps described in
section "BEFORE YOU BEGIN")

Once a channel is assigned to a remote unit, you can
change it by removing the batteries or resetting the unit.

BATTERY INSTALLATION: MAIN UNIT

The main unit uses two (2) UM-3 or "AA" size alkaline batteries.

Follow these steps to install / replace batteries:

1. Slide open the battery compartment door.
2. Insert the batteries strictly according to the polarities shown therein.
3. Replace the battery compartment door.

Replace the batteries when the low-battery indicator of the indoors
temperature lights up. (Repeat the steps described in section
"BEFORE YOU BEGIN")

If not disposed of properly, batteries can be harmful.
Protect the environment by taking exhausted batteries

GETTING STARTED

are placed in a given remote sensor unit, it will start
formation at 40-second intervals.

roximately a 3-minute duration, the main unit will
earch for signals once batteries are installed. Upon
ption, the individual channel temperature reading
d on the top line and the respective humidity reading
line. The main unit will automatically update its
ut 40-second intervals.

e received, blanks " --- " will be displayed and the
on will not show.

al search:

hold **IN/REMOTE** for 2-seconds to enforce a
arch.

synchronizing the transmission and reception of the
n units.

ep whenever you find discrepancies between the
on the main unit and that on the respective remote

TO CHECK REMOTE AND

Kinetic-wave Icon				
Designated Display	Indoor Display	Remote Display Channel One	Remote Display Channel Two	Remote Display Channel Three

To display temperature / humidity readings from the main unit:

- Press **IN / REMOTE** until a dot is displayed in the box under the kinetic-wave.

To display temperature / humidity readings from a remote sensor:

- Press **CHANNEL** until the appropriate remote sensor channel is displayed in the box under the kinetic-wave.

If no readings are received from one particular channel for more than 15 minutes, blanks " --- " will be displayed until further readings are successfully searched. Check the remote sensor to ensure that it is secure and that the correct channel has been selected. Optionally, press and hold **IN/REMOTE** for 2-seconds to enforce a search.

ion data are securely	
s.	

COMFORT-LEVEL ICONS

level is based on the recorded relative humidity. An icon will be displayed to show if the level is comfortable, wet or dry.

Level	COMFORT	DRY	WET
-------	---------	-----	-----

TEMPERATURE AND HUMIDITY TREND INDICATORS

Temperature-trend and humidity-trend indicators show the trends in the readings. Arrows indicate a rising, steady or falling trend.

Arrow Indicator			
Temperature Trend	Rising	Steady	Falling

Arrow indicator			
Humidity Trend	Rising	Steady	Falling

Note: If the temperature goes above or below the temperature measuring range of the main unit or the remote unit (stated in specification), the display will show "HHH" or "LLL".

REMOTE SENSOR SCANNING

The unit can be set to automatically scan and display readings from the remote sensors. When the remote-sensor mode is active, the display will show the readings from one channel for about 4-seconds and then proceed to the next channel display.

the remote-sensor scanning mode:
button.

MAXIMUM AND MINIMUM TEMPERATURE AND HUMIDITY

and minimum recorded temperature and humidity
automatically be stored in the memory.

maximum and minimum display memory:
channel to be checked.

MEM/CLEAR once to display the maximum temperature
the minimum temperature. The respective indicators,
HI and **LO** will be displayed.

memory:
hold **MEM/CLEAR** for 2-seconds.

MEM/CLEAR now, the maximum and minimum
will have the same values as the current ones until
ings are recorded.

HOW TO USE CHANNEL-1 TEMPERATURE/HUMIDITY ALARM

Upper and lower temperature and humidity limits for channel-1 can
be set so that an alarm activates when the limits are exceeded.

The high and low temperature and humidity displays are selected by
sequentially pressing **HI/LO**.

The high-low displays are as follows:

Sequence	Respective Display
Pressing HI/LO once	Enters HI temperature display
Pressing HI/LO twice	Enters HI humidity display
Pressing HI/LO three times	Enters LO temperature display
Pressing HI/LO a four time	Enters LO humidity display

To set a high or low temperature or humidity alarm:

1. Press **HI/LO**, channel-1 will be displayed.
2. Press **▲** to set the temperature or humidity limit. Each press will
increase increments by one degree or percentage. Press and hold
the button for a rapid-scrolling sequence by increments of five.

temperature range is from -50°C (-58°F) to $+70^{\circ}\text{C}$

the first time you set the limits, the lower limit will start at -58°C (-58°F) and the upper limit $+70^{\circ}\text{C}$ (158°F). After that, the reading will start from the temperature last selected.

humidity range is from 2% to 98%.

the first time you set the limits, the lower limit will start at 2% and the upper limit 98%. Otherwise, the reading will start from the humidity last selected.

steps to set the upper humidity setting and the lower humidity and humidity settings.

When the alarm is triggered, press **HI/LO** to set another limit or wait 1 minute and the unit will automatically return to the normal mode. The respective **HI**, **LO** or both indicators will light up to indicate the status of the alarm.

If a channel other than channel one is selected, when the alarm is triggered the display will switch to channel-1 and the display will be blank. If the display is left untouched, the alarm will activate for a 1-minute. After that, the alarm will momentarily stop the alarm. The alarm will activate again if the reading momentarily exceeds the set limit.

To disable an alarm:

1. Enter the setting mode by pressing **HI/LO**.
2. Then, press **AL ON/OFF**.

The alarm has been disabled and will not sound at the previously set limit.

To disable a sounding alarm:

- Press any button, the alarm sound will stop.

DISCONNECTED SIGNALS

If without obvious reasons the display for a particular channel goes blank, press **IN/REMOTE** to enforce an immediate search.

If that fails, check:

1. The remote unit of that channel is still in place.
2. The batteries of both the remote unit and main unit. Replace as necessary.

Note that when the temperature falls below freezing point, the batteries of outdoor units will freeze, lowering their voltage supply and the effective range.

TRANSMISSION COLLISION

Other household devices, such as door bells, home security systems and entry controls, may interfere with those of this device. This may cause a temporary reception failure. This is normal and does not affect the general performance of the product. The normal reception of temperature readings will resume once the interference recedes.

NOTE ON °C AND °F

The temperature display is selected on the °C/°F slide switch. The display shows temperature in Centigrade or °F for Fahrenheit.

The remote temperature display on the main unit is selected by the selection on the °C/°F slide switch of the remote unit. Whatever the display units of the remote sensors, the display on the main unit will be automatically converted to the chosen one of the main unit.

LOW BATTERY WARNING

HOW TO USE THE TABLE STAND OR WALL MOUNTING

The main unit has a retractable table stand, which when flipped open, can support the unit on a flat surface. Or you can flip close the stand and mount the unit on a wall using the recessed screw hole.

As for the remote unit, it comes with a wall-mount holder and a removable stand. Use either to hold the unit in place.

THE RESET BUTTON

is only used when the unit is operating in an unfavorable functioning. Use a blunt stylus to hold down the button. will return to their default values.

PRECAUTIONS

is engineered to give you years of satisfactory service e it carefully. Here are a few precautions:

immerse the unit in water.

lean the unit with abrasive or corrosive materials. They atch the plastic parts and corrode the electronic circuit.

bject the unit to excessive force, shock, dust, temperature ity, which may result in malfunction, shorter electronic , damaged battery and distorted parts.

mpner with the unit's internal components. Doing so will e the warranty on the unit and may cause unnecessary The unit contains no user-serviceable parts.

fresh batteries as specified in the user's manual. Do not and old batteries as the old ones may leak

read the user's manual thoroughly before operating the

SPECIFICATIONS

This product complies to standards and specifications of BZT, FCC and article number 334 of PTT.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

CAUTION

Content of this manual is subject to change without notice.

Due to printing limitation, the displays shown in this manual may differ from the actual display.

The manufacturer and its suppliers held no responsibility to you or any other person for any damage, losses, lost profits, or any other claim arise by using this product.

The contents of this manual may not be reproduced without the permission of the manufacturer.
