

# Zefon Air Sampling Media Selection Guide

A handy and convenient cross reference tool designed to help you locate the correct sampling equipment quickly.

It's as easy and 1, 2 and 3!

# Zefon Air Sampling Media Selection Guide

The Zefon Air Sampling Media Selection Guide is an easy to use guide for quickly selecting the media needed to sample for specific chemicals. Simply locate the chemical hazard you need to sample for, verify the agency standard you need to comply with and go to the specified pages.

This guide is intended solely as a convenience for locating the needed equipment quickly and easily. It should not be used as a replacement for the actual agency standards. If you need a copy of a sampling standard, the fastest, most up-to-date method is to download a copy from the specified agency. Links to these agencies are located below:
